DETAILED ACTION

Applicant's amendment of 11-19-02 has been considered. Although applicant's argument has overcome the previous rejection of 112/1st paragraph (regarding the lack of enablement for the scope of Ar), the specification still does not provide sufficient enablement for the scope of the claims since the proviso has been deleted from claim 1. Also, another issue of 112/2nd has been noted. Thus, the following ground(s) of rejection are presented herein.

Oath/Declaration

This application presents a claim for subject matter not originally claimed or embraced in the statement of the invention. That is, the previously excluded subject matter is now embraced by claim 1 in the preliminary amendment. It is recognized that under 37 CFR 1.53(b), the preliminary amendment [filed at the same time with the application] is considered a part of the original disclosure. However, a new oath or declaration is needed to refer to both the application and the amendment. See MPEP §§ 608.04.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 1, 2, 7, 16, 18, 23, 24, 26-33, 36, 43, 44, and 50-54 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 1 has been amended to embrace the compounds of Formula (Ia) with A or B can represent phenyl. Said embodiment has been excluded in the specification (see the proviso on page 6). Thus the provided enablement [for preparation and use] is not directed to those compounds with A or B can be phenyl. Furthermore, none of the preferred embodiments and species made has A or B as a phenyl ring. Therefore, those compounds of formula (Ia) with A or B as a phenyl ring simply have no support in the instant disclosure.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 43 and 51 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following reasons apply:

a. Claim 43 recites the phrase "in particular" which is considered as an "exemplary language", and renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Art Unit: 1624

- b. Claim 51 is an improper dependent claim because it depends on claim 37 which has been cancelled by the preliminary amendment.

Claim Objections

3. Claim 34 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Said claim recites species that are not taught in any of the references of record.
